Documentation]] | [[http://www.craftysyntax.com/bb/viewtopic.php?t=1614
Forum]] | ScreenShots | FeatureRequest | DonationPage\n---\n**###LC2
Version 2.4.2**\n - Fixed popup bug.\n\n**###LC2 Version 2.4**\n - Can
press enter while in search box.\n - Add more status text info.\n
- Rebuilt the popup notification... No longer running from DLLs.
One compile for all Window OSes.\n - One setup file for Windows 95/95,
ME, 2000, and XP.\n - Removed the check if right version because it
is no longer needed.\n - Sound notification now works independently of
the popup notification. (meaning you can now have both or one or the
other.)\n\n**###LC2 Version 2.3.5**\n - Rearranged menus\n -
Added menu option to check if right version is running with the OS and

```

correct Service Packs installed.\n - Added built in google search (to help the user search for answers to customers).\n - Realized that the popup doesn't work if compiled with SP2 but running without and vice versa, so made a SP2 compiled version for Windows XP. \n - Updated the installer.\n\n\*\*\*LC2 Version 2.3\*\*\n - Menu options to change online status from LC2.\n - Added option to go Offline with inactivity.\n - Set to use phpsession to work around odd bug.\n - Changed the popup tool window to a fully adjustable window.\n - Added matchip option <input type=radio name=matchip value=Y>\n - Added Start status online at startup\n - Added help links to [[CraftySyntax.com]] and to the LC2 donation page.\n - Fixed odd bug that caused login problems for some. (Stopped LC2 from contacting site untill fully logged in)\n - Added status bar with online/offline status, visitor counts, chat counts, and general status information.\n - Major clean up of code and variables. Should make things a little quicker.\n\n\*\*\*LC2 Version 2.2\*\*\n - Added encryption to password in the settings file\n - Fixed the reconnect menu option that I broke some time ago when making other changes\n - Added Documentation menu option\n - Check for updates menu option (under tools)\n - Check for newest release of the server file installed\n (Shows up under the tool menu option to download if newest file is not installed)\n\n###Older releases\n A changelog was not tracked prior to version 2.2', 'FlatterY', 'FlatterY', 'N', 'typo', 'page');

INSERT INTO `pages` VALUES (16, 'WikiCategory', '2006-08-11 14:25:43', '===This wiki is using a very flexible but simple categorizing system to keep everything properly organized.===\n\n{{Category page="/'

col="10"}\n==Here''s how it works :=\n~- The master list of the categories is **Category Category** (//without the space//) which will automatically list all known maincategories, and should never be edited. This list is easily accessed from the Wiki''s top navigation bar. (Categories).\n~- Each category has a WikiName name of the form **CategoryName** for example CategoryWiki etc. (see list of maincategories above)\n~- Pages can belong to zero or more categories. Including a page in a category is done by simply mentioning the **CategoryName** on the page (by convention at the very end of the page).\n~- The system allows to build hierarchies of categories by referring to the parent category in the subcategory page. The parent category page will then automatically include the subcategory page in its list.\n~- A special kind of category is **Category Users** (//without the space//) to group the userpages, so your Wiki homepage should include it at the end to be included in the category-driven userlist.\n~- New categories can be created (think very hard before doing this though, we don''t need too much of them) by creating a **CategoryName** page, including **{{Category}}** in it and placing it in the **Category Category** (//without the space//) category (for a main category or another parent category in case you want to create a subcategory).\n\n**Please help to keep this place organized by including the relevant categories in new and existing pages !**\n\n**Notes:** \n~- The above bold items above //include spaces// to prevent this page from showing up in the mentioned categories. This page only belongs in CategoryWiki (which can be safely mentioned) after all !\n~- In order to avoid accidental miscategorization you should **avoid** mentioning a non-related **CategoryName** on a page. This is a side-effect of how the categorizing system works: it''s based on a textsearch and is not restricted to the footer convention.\n~- Don''t be put of by the name of this page (WikiCategory) which is a logical name (it''s about the Wiki and explains Category) but doesn''t have any special role in the Categorizing system.\n~- To end with this is the **standard convention** to include the categories (both the wiki code and the result):\n\n%  
==Categories==\nCategoryWiki%\n\n==Categories==\nCategoryWiki',  
'(Public)', 'WikkaInstaller', 'Y', '', 'page');  
INSERT INTO `pages` VALUES (17, 'CategoryWiki', '2006-08-11 14:25:43',  
'===Wiki Related Category===\nThis Category will contain links to pages talking about Wikis and Wikis specific topics. When creating such pages, be sure to include CategoryWiki at the bottom of each page, so that page shows listed.\n\n\n----\n\n{{Category col="3"}}\n\n\n----\n  
[[CategoryCategory List of all categories]], '(Public)',  
'WikkaInstaller', 'Y', '', 'page');  
INSERT INTO `pages` VALUES (18, 'CategoryCategory', '2006-08-11  
14:25:43', '===List of All Categories===\nBelow is the list of all Categories existing on this Wiki, granted that users did things right when they created their pages or new Categories. See WikiCategory for how the system works.\n\n\n----\n\n{{Category}}', '(Public)',  
'WikkaInstaller', 'Y', '', 'page');  
INSERT INTO `pages` VALUES (19, 'FormattingRules', '2006-08-11  
14:25:43', '====Wikka Formatting Guide====\n\n<<**Note:** Anything between 2 sets of double-quotes is not formatted.<<::c::\nOnce you have read through this, test your formatting skills in the SandBox.\n----  
\n===1. Text Formatting===\n\n~##**I''m bold**##\n~**I''m bold** \*\n\n~##**//I''m italic text!**//**##\n~//I''m italic text!**//\n\n~##**And I''m underlined!**##\n~**And I''m underlined!**\n\n~##**monospace text##\n\n~##**''''highlight text''''##**  
(using 2 single-quotes)\n~**''''highlight text''''**\n\n~##**++Strike through text++**##\n~**++Strike through text++**\n\n~##**Press %ANY KEY%##\n~Press %ANY KEY%\n\n~##**@@Center text@@**##\n~**@@Center text@@**\n\n===2. Headers===\n\nUse between five **###** (for the biggest header) and two **##** (for the smallest header) on both sides of a text****

to render it as a header.  
 Really big header  
 Really big header  
 Rather big header  
 Medium header  
 Not-so-big header  
 Smallish header  
 Horizontal separator  
 Forced line break  
 Lists and indents  
 You can indent text using a `***`, a `***tab***` or `***4 spaces***` (which will auto-convert into a tab).  
 This text is indented  
 This text is double-indented  
 This text is also indented  
 This text is indented  
 This text is double-indented  
 This text is also indented  
 To create bulleted/ordered lists, use the following markup (you can always use 4 spaces instead of a `***`):  
 Bulleted lists  
 Line one  
 Line two  
 Line one  
 Line two  
 Numbered lists  
 1) Line one  
 1) Line two  
 Ordered lists using uppercase characters  
 A) Line one  
 A) Line two  
 Ordered lists using lowercase characters  
 a) Line one  
 a) Line two  
 Ordered lists using roman numerals  
 I) Line one  
 I) Line two  
 Ordered lists using lowercase roman numerals  
 i) Line one  
 i) Line two  
 Inline comments  
 To format some text as an inline comment, use an indent (`***`, `***tab***` or `***4 spaces***`) followed by a `***&#x2014;***`.  
 Example: `***&#x2014; Comment`  
 Subcomment `***&#x2014; Comment`  
 Subcomment `***&#x2014; Subsubcomment`  
 Images  
 To place images on a Wiki page, you can use the `##image##` action.  
 Example:  

```

<div style="text-align:center">
<img alt="DVD logo" title="An Image Link"
url="images/dvdvideo.gif" link="RecentChanges"/>
</div>

```

 Links can be external, or internal Wiki links. You don't need to enter a link at all, and in that case just an image will be inserted. You can use the optional classes `##left##` and `##right##` to float images left and right. You don't need to use all those attributes, only `##url##` is required while `##alt##` is recommended for accessibility.  
 Links  
 To create a link to a wiki page you can use any of the following options:  
 1) type a `##WikiName##`:  

```

<div style="text-align:center">
<span>FormattingRules</span>
</div>

```

 add a forced link surrounding the page name by `##["## and ##"]##` (everything after the first space will be shown as description):  

```

<div style="text-align:center">
<span>[[SandBox Test your formatting skills]]</span>
</div>

```

 add an image with a link (see instructions above).  
 To link to external pages, you can do any of the following:  
 1) type a URL inside the page:  

```

<div style="text-align:center">
<span>http://www.example.com</span>
</div>

```

 add a forced link surrounding the URL by `##["## and ##"]##` (everything after the first space will be shown as description):  

```

<div style="text-align:center">
<span>[[http://example.com/jenna/ Jenna's Home Page]]</span>
</div>

```

 add an image with a link (see instructions above);  
 1) add an interwiki link (browse the [InterWiki list of available interwiki tags]):  

```

<div style="text-align:center">
<span>[[Wikipedia:WikkaWiki]]</span>
</div>

```

 Google:CSS  
 Thesaurus:Happy  
 Tables  
 To create a table, you can use the `##table##` action.  
 Example:  

```

<div style="text-align:center">
<table border="1" style="width:100%; border-collapse: collapse;">
<tr>
<td style="width:33%; height: 20px;></td>
<td style="width:33%; height: 20px;></td>
<td style="width:33%; height: 20px;></td>
</tr>
</table>
</div>

```

```

cells="BIG;GREEN;FROGS;yes;yes;no;no;no;###"}"###\n\n~{{table
columns="3" cellpadding="1" cells="BIG;GREEN;FROGS;yes;yes;no;no;no;
###"}}\n\nNote that ###"####"### must be used to indicate an empty cell.
\nComplex tables can also be created by embedding HTML code in a wiki
page (see instructions below).\n\n===10. Colored Text===\n\nColored text
can be created using the ##color## action:\n\n**Example:**\n
\n~##"{{color c="blue" text="This is a test.}}"###\n~{{color c="blue"
text="This is a test.}}\n\nYou can also use hex values:\n\n**Example:**
\n\n~##"{{color hex="#DD0000" text="This is another test.}}"###\n~
{{color hex="#DD0000" text="This is another test.}}\n\nAlternatively,
you can specify a foreground and background color using the ##fg## and
##bg## parameters (they accept both named and hex values):\n
\n**Examples:**\n\n~##"{{color fg="#FF0000" bg="#000000" text="This is
colored text on colored background"}}"###\n~{{color fg="#FF0000" bg="#
000000" text="This is colored text on colored background"}}\n
\n~##"{{color fg="lightgreen" bg="black" text="This is colored text on
colored background"}}"###\n~{{color fg="lightgreen" bg="black"
text="This is colored text on colored background"}}\n\n\n===11.
Floats===\n\nTo create a **left floated box**, use two ##<## characters
before and after the block.\n\n**Example:**\n\n~##"<<Some text in
a left-floated box hanging around<<Some more text as a filler.
Some more text as a filler. Some more text as a filler. Some more text
as a filler. Some more text as a filler. Some more text as a filler.
Some more text as a filler. Some more text as a filler."###\n\n<<Some
text in a left-floated box hanging around<<Some more text as a filler.
Some more text as a filler. Some more text as a filler. Some more text
as a filler. Some more text as a filler. Some more text as a filler.
Some more text as a filler. Some more text as a filler.\n\n::c::To
create a **right floated box**, use two ##>## characters before and
after the block.\n\n**Example:**\n\n~##">>Some text in a right-floated
box hanging around>>Some more text as a filler. Some more text as a
filler. Some more text as a filler. Some more text as a filler. Some
more text as a filler. Some more text as a filler. Some more text as a
filler. Some more text as a filler."###\n\n >>Some text in a right-
floated box hanging around>>Some more text as a filler. Some more text
as a filler. Some more text as a filler. Some more text as a filler.
Some more text as a filler. Some more text as a filler. Some more text
as a filler. Some more text as a filler.\n\n::c:: Use ##"::c::"### to
clear floated blocks.\n\n===12. Code formatters===\n\nYou can easily
embed code blocks in a wiki page using a simple markup. Anything within
a code block is displayed literally. \nTo create a **generic code
block** you can use the following markup:\n\n~##"%% This is a code
block %%"###. \n\n%% This is a code block %%\n\nTo create a **code block
with syntax highlighting**, you need to specify a //code formatter//
(see below for a list of available code formatters). \n\n~##"%%
("{{color c="red" text="php"}}")<br />&lt;?php<br />echo "Hello,
World!";<br />?&gt;<br />%%"###\n\n%(php)\n<?php\necho "Hello, World!";
\n?>\n%%\n\nYou can also specify an optional //starting line// number.\n
\n~##"%%(php;"{{color c="red" text="15"}}")<br />&lt;?php<br />echo
"Hello, World!";<br />?&gt;<br />%%"###\n\n%(php;15)\n<?php\necho
"Hello, World!";\n?>\n%%\n\nIf you specify a //filename//, this will be
used for downloading the code.\n\n~##"%%(php;15;"{{color c="red"
text="test.php"}}")<br />&lt;?php<br />echo "Hello, World!";<br />?&gt;
<br />%%"###\n\n%(php;15;test.php)\n<?php\necho "Hello, World!";\n?>
\n%%\n\n**List of available code formatters:**\n\n{{table columns="6"
cellpadding="1"
cells="LANGUAGE;FORMATTER;LANGUAGE;FORMATTER;LANGUAGE;FORMATTER;Actionsc
ript;actionscript;ADA;ada;Apache Log;apache;AppleScript;
applescript;ASM;asm;ASP;asp;AutoIT;autoit;Bash;bash;BlitzBasic;blitzbasi
c;C;c;C for Macs;c_mac;c#;csharp;C++;cpp;CAD
DCL;caddcl;CadLisp;cadlisp;CFDG;cfdg;ColdFusion;cfm;

```

- Added matchip option <input type=radio name=matchip value=Y>\n
 - Added Start status online at startup\n
 - Added help links to [[CraftySyntax.com]] and to the LC2 donation page.\n
 - Fixed odd bug that caused login problems for some. (Stopped LC2 from contacting site untill fully logged in)\n
 - Added status bar with online/offline status, visitor counts, chat counts, and general status information.\n
 - Major clean up of code and variables. Should make things a little quicker.\n
 \n\*\*###LC2 Version 2.2\*\*\n
 - Added encryption to password in the settings file\n
 - Fixed the reconnect menu option that I broke some time ago when making other changes\n
 - Added Documentation menu option\n
 - Check for updates menu option (under tools)\n
 - Check for newest release of the server file installed\n
 (Shows up under the tool menu option to download if newest file is not installed)\n
 \n###Older releases\n
 A changelog was not tracked prior to version 2.2', 'FlatterY', 'FlatterY', 'N', '2.4.2', 'page');

 ----\n
 \nDocumentation site for CSLH Live Client.\n
 (Always under construction. The site is a Wiki, feel free to help.)\n
 \nThis is a front end, windows client for Crafty Syntax Live Help. It comes with many added features that allow you to know what is going on by quickly looking at the system tray Icon. You will also need to install the LC2 Server file to your server for the new features to work.\n
 \nSome current features include:\n
 - MSN style popup and sound notifications from system tray.\n
 - Minimizable to system tray.\n
 - System tray icon changes with site status (idle, visitors, or chatters).\n
 - Auto login features.\n
 - Auto update options.\n
 - Session options to remember window placements.\n
 - Options to start in live chat mode.\n
 - Options to start maximized, minimized or normally.\n
 - Optional auto offline after being idle X number of minutes (configurable option).\n
 - Ability to change online and offline status through client.\n
 - User will stay available online even after leaving the chat page so chats can still come in while you are doing other things. Go offline to stop chats.\n
 - Built in google search.\n
 \nOct. 5, 2006\n
 Ooops, I found a bug in LC2 version 2.4.0. If your popups only work when you first start LC2 and then they stop working you need to download this bug release version 2.4.2. Those who already have version 2.2 and up can use the check for updates to check and install automatically. In version 2.4.0 this can be found under the "Help" menu.\n
 \n\nAug. 29, 2006\n
 Released LC2 version 2.4 today. I was getting tired of compiling ever new release on multiple OSes so I finally rebuilt the popup notification code so that one setup file will work on Window OSes. This may also lead to cosmetic changes in the popup in the future. If you had problems with the popup notification not working then this is the release for you. You should install this version as the rebuild should allow it to work now. [[ChangeLog Click here to view the entire change log]].\n
 \n\nAug. 19, 2006\n
 Released another version of LC2 today. version 2.3 is now available. Even though it has only been a few days since 2.2, once I get working on something, I have a hard time putting it down. This is a pretty big release with some nice new features and some bug fixes. If you have had any issues with older versions of LC2, you will want to download this new version. \nDocumentation site for CSLH Live Client.\n\n(Always under construction.
The site is a Wiki, feel free to help.)\n\nThis is a front end, windows
client for Crafty Syntax Live Help. It comes with many added features
that allow you to know what is going on by quickly looking at the system
tray Icon. You will also need to install the LC2 Server file to your
server for the new features to work.\n\nSome current features include:\n
- MSN style popup and sound notifications from system tray.\n
- Minimizable to system tray.\n - System tray icon changes
with site status (idle, visitors, or chatters).\n - Auto login
features.\n - Auto update options.\n - Session options to remember
window placements.\n - Options to start in live chat mode.\n -
Options to start maximized, minimized or normally.\n - Optional auto
offline after being idle X number of minutes (configurable option).\n
- Ability to change online and offline status through client.\n
- User will stay available online even after leaving the chat page
so chats can still come in while you are doing other things. Go offline
to stop chats.\n - Built in google search.\n\nAug. 29, 2006\n
Released LC2 version 2.4 today. I was getting tired of compiling
ever new release on multiple OSes so I finally rebuilt the popup
notification code so that one setup file will work on Window OSes. This
may also lead to cosmetic changes in the popup in the future. If you had
problems with the popup notification not working then this is the
release for you. You should install this version as the rebuild should
allow it to work now. [[ChangeLog Click here to view the entire change
log]].\n \n \nAug. 19, 2006\n Released another version of LC2
today. version 2.3 is now available. Even though it has only been a few
days since 2.2, once I get working on something, I have a hard time
putting it down. This is a pretty big release with some nice new
features and some bug fixes. If you have had any issues with older
versions of LC2, you will want to download this new version. [[ChangeLog

'[[HelpDocuments Return to table of contents.]]\n\n====Installing LC2
====\n\nThe first step to installing LC2 is to downloaded the needed
files.\n - First you need to download the ""LiveClient2"" client
setup files that work with your operating system (Windows XP, Windows
2000, or Windows 98/95).\n - Second you need the latest release of
the server file. If you have the newest release of CSLH you probably
already have the newest release installed.\n\nNow that you have the
files, it is time to install the files.\n - Installing ""LiveClient2"".\n
\n - Simply run the setup file that you have downloaded and
follow the typical installation process.\n - Installing the server
file.\n - To install the server file (if not already included
with your CSLH installation), you need to unzip the

```

client\_visitors.php.zip file with your favorite zip utility. (this could be winzip, Windows XP's built in zip utility, or a number of other zip utilities out there).\n

- Inside the client\_visitors.php.zip file you should find the file client\_visitors.php. This file needs to be placed on your server in the CSLH root directory. This is the same directory that contains other files such as admin.php, admin\_actions.php, livehelp.php, config.php, and a number of many other files. If the client\_visitors.php file already exists in this directory then it was already installed with CSLH, but it wont hurt to replace it with a newly downloaded file to ensure that you have the latest release.

\n

- Thats it, now the server files is installed\n\nGood Luck and Enjoy!', 'FlatterY', 'FlatterY', 'Y', '', 'page');

the options\n==== Website Login Setup====\n - \*\*Automatic login at  
start up:\*\* â€œ if you have this check then you will automatically log  
in to your CSLH web site when "LiveClient2" is started up.\n -  
\*\*Match IP to sessions\*\* - "Match Ip to Session" is a security  
setting which, when enabled, requires that the session ID used to access  
the administration matches the operators IP address used when logging  
into the admin. This is to prevent users who follow referrer links  
clicked on in the "data" tab that have the session ID in the query  
string from gaining access to the admin. However, the downside in  
enabling this is that operators with dynamic ip addresses will not be  
able to log in.\n\n - \*\*User Name:\*\* - This is your CSLH login name  
that you use to login to CSLH\n - \*\*Password:\*\* - This is your CSLH  
password that you use to login to CSLH\n - \*\*URL:\*\* - this is the  
website address pointing to your CSLH install. Example:\n  
"http://www.YourDomain.com/CSLH"\n  
"http://www.YourDomain.com/live\_help" Do not use

"www.YourDomain.com/login.php"\n - \*\*Start in live chat mode:\*\*" if this is checked, and then when you start up "LiveClient2, LiveClient2" will automatically navigate you to the chat or "Live Help!" section of CSLH.\n - Start Normal, Start Maximized, or Start Minimized circle/dot option\n - \*\*Start Normal:\*\*" If this one is checked then "LiveClient2" will start up at a normal size.\n - \*\*Start Maximized:\*\*" If this one is checked then "LiveClient2" will start up maximized (the client will be full sized to your screen).\n\n - \*\*Start Minimized:\*\*" - If this one is checked then "LiveClient2" will start up minimized to your system tray. This means no client window will be visible but it will still be running in your system tray.\n - \*\*Sessions:\*\*" If this box is checked then your client will remember the size of the windows when you close them and open back up at the same size and location that they were last closed.\n\n - \*\*Startup "LiveClient" with Windows:\*\*" If this box is checked then "LiveClient2" should start up and run when Windows is started up.\n\n - \*\*Add Quick Launch Icon:\*\*" Pushing this button will add "LiveClient2" to your quick launch area. (This can also be done during the install).\n\n - \*\*Add Desktop Icon:\*\*" Pushing this button will add "LiveClient2" to your Desktop (this can also be done during the install).\n\n\n====Notification Setup====\n\n - \*\*Popup notify when new visitors enter the room:\*\*" If this box is checked, then a popup notification will notify you when new visitors enter a web site.\n\n - \*\*Keep popup displayed until I close it:\*\*" Checking this will keep your popup notifications open until you close the notification by clicking the close button. Chat popups always stay open until you close them so you don't miss a chat.\n\n - \*\*Disable popup sounds:\*\*" Check this if you do not want "LiveClient2" built in sounds to sound off when the popup come up.\n\n - \*\*Seconds notification popup is up for if active:\*\*" Put the number of seconds in this box that you want the popups to be displayed for before they disappear.\n\n\n====Status Setup====\n\n - \*\*Minutes of inactivity before going offline\*\* - This is an option to go offline after the computer is idle for so many minutes. Set this to the number of minutes you want to be idle before going offline or set to 0 (zero) to disable. When you are taken offline you will still receive notifications of visitors, but you will be unavailable for chat. Visitors will see you as unavailable for chat.\n\n - \*\*Set status to online at LC2 start up\*\* - This will set your available status to online when LC2 is started up. This will allow you to be available for chat immediately, without navigating to the chat screen.\n\n\n - \*\*OK:\*\*" will save and close your options.\n\n - \*\*Cancel:\*\*" will close options without saving.\n\n - \*\*Apply:\*\*" will save your options without closing options (some options need a restart before taking effect).', 'FlatterY', 'FlatterY', 'N', '2.3.5 Options', 'page'); INSERT INTO `pages` VALUES (64, 'ChangeLog', '2006-08-25 16:36:40', 'HomePage | [[http://starhostdesign.com/modules.php?name=Downloads&d\_op=viewdownload&cid=1 Downloads]] | [[HelpDocuments Documentation]] | [[http://www.craftysyntax.com/bb/viewtopic.php?t=1614 Forum]] | ScreenShots | FeatureRequest | DonationPage\n----\n\*\*###LC2 Version 2.3.5\*\*\n - Rearranged menus\n\n - Added menu option to check if right version is running with the OS and correct Service Packs installed.\n\n - Added built in google search (to help the user search for answers to customers).\n\n - Realized that the popup doesn't work if compiled with SP2 but running without and vice versa, so made a SP2 compiled version for Windows XP.\n\n - Updated the installed.\n\n\n\*\*###LC2 Version 2.3\*\*\n\n - Menu options to change online status from LC2.\n\n - Added option to go Offline with inactivity.\n\n - Set to use phpsession to work around odd bug.\n\n - Changed the popup tool window to a fully adjustable window.\n\n - Added matchip option <input type=radio name=matchip value=Y>\n\n - Added Start status online at

\nDocumentation site for CSLH Live Client.\n(Always under construction.
The site is a Wiki, feel free to help.)\n\nThis is a front end, windows
client for Crafty Syntax Live Help. It comes with many added features
that allow you to know what is going on by quickly looking at the system
tray Icon. You will also need to install the LC2 Server file to your
server for the new features to work.\nSome current features include:\n
- MSN style popup and sound notifications from system tray.\n
- Minimizable to system tray.\n - System tray icon changes
with site status (idle, visitors, or chatters).\n - Auto login
features.\n - Auto update options.\n - Session options to remember
window placements.\n - Options to start in live chat mode.\n -
Options to start maximized, minimized or normally.\n - Optional auto
offline after being idle X number of minutes (configurable option).\n
- Ability to change online and offline status through client.\n
- User will stay available online even after leaving the chat page
so chats can still come in while you are doing other things. Go offline
to stop chats.\n\nAug. 19, 2006\n Released another version of LC2
today. version 2.3 is now available. Even though it has only been a few
days since 2.2, once I get working on something, I have a hard time
putting it down. This is a pretty big release with some nice new
features and some bug fixes. If you have had any issues with older
versions of LC2, you will want to download this new version. [[ChangeLog
Click here to view the entire change log]].\n \n\nUseful pages:
FormattingRules, WantedPages, TextSearch.', 'FlatterY', 'FlatterY',

the day)\n Released version 2.4.3. Releasing bug fixes faster than Mr
Gates. Thanks to volcano I found a few other bugs... and squashed them.
Auto update and get the newest release today... sorry guys... remember
to report bugs and feature requests to me so I can make this the best
client it can be.\n \n\nOct. 5, 2006\n Ooops, I found a bug in LC2
version 2.4.0. If your popups only work when you first start LC2 and
then they stop working you need to download this bug release version
2.4.2. Those who already have version 2.2 and up can use the check for
updates to check and install automatically. In version 2.4.0 this can be

```

found under the "Help" menu.\n\n\nAug. 29, 2006\n Released LC2 version 2.4 today. I was getting tired of compiling ever new release on multiple OSes so I finally rebuilt the popup notification code so that one setup file will work on Window OSes. This may also lead to cosmetic changes in the popup in the future. If you had problems with the popup notification not working then this is the release for you. You should install this version as the rebuild should allow it to work now.

[[ChangeLog Click here to view the entire change log]].\n \n \nAug. 19, 2006\n Released another version of LC2 today. version 2.3 is now available. The site is a Wiki, feel free to help.)\n\nThis is a front end, windows client for Crafty Syntax Live Help. It comes with many

added features that allow you to know what is going on by quickly looking at the system tray Icon. You will also need to install the LC2 Server file to your server for the new features to work.\nSome current features include:\n - MSN style popup and sound notifications from system tray.\n - Minimizable to system tray.\n - System tray icon changes with site status (idle, visitors, or chatters).\n - Auto login features.\n - Auto update options.\n - Session options to remember window placements.\n - Options to start in live chat mode.\n - Options to start maximized, minimized or normally.\n - Optional auto offline after being idle X number of minutes (configurable option).\n - Ability to change online and offline status through client.\n - User will stay available online even after leaving the chat page so chats can still come in while you are doing other things. Go offline to stop chats.\n - Built in google search.\n\nOct. 5, 2006 (Later in the day)\n Released version 2.4.3. Releasing bug fixes faster than Mr Gates. Thanks to volcano I found a few other bugs... and squashed them. Auto update and get the newest release today... sorry guys... remember to report bugs and feature requests to me so I can make this the best client it can be.\n \nOct. 5, 2006\n Ooops, I found a bug in LC2 version 2.4.0. If your popups only work when you first start LC2 and then they stop working you need to download this bug release version 2.4.2. Those who already have version 2.2 and up can use the check for updates to check and install automatically. In version 2.4.0 this can be found under the "Help" menu.\n\n\nAug. 29, 2006\n Released LC2 version 2.4 today. I was getting tired of compiling ever new release on multiple OSes so I finally rebuilt the popup notification code so that one setup file will work on Window OSes. This may also lead to cosmetic changes in the popup in the future. If you had problems with the popup notification not working then this is the release for you. You should install this version as the rebuild should allow it to work now.

[[ChangeLog Click here to view the entire change log]].\n \n \nAug. 19, 2006\n Released another version of LC2 today. version 2.3 is now available. Even though it has only been a few days since 2.2, once I get working on something, I have a hard time putting it down. This is a pretty big release with some nice new features and some bug fixes. If you have had any issues with older versions of LC2, you will want to download this new version. [[ChangeLog Click here to view the entire change log]].\n \n\n\nUseful pages: FormattingRules, WantedPages, TextSearch.', 'FlatterY', 'FlatterY', 'N', '', 'page');

 '[[HelpDocuments Return to table of contents.]]\n\n====Options====\n
 \nAfter installing a fresh copy of **"LiveClient2"** you will be asked to
 set the **"LiveClient2"** options.\nEven if it isn't a fresh install, it
 is a good idea to check the options after an upgrade because you may
 have new options that you will want to configure.\n\nLet's go through
 the options\n==== Website Login Setup====\n - **Automatic login at
 start up:** " if you have this check then you will automatically log
 in to your CSLH web site when **"LiveClient2"** is started up.\n -
 **Match IP to sessions** - "Match Ip to Session" is a security
 setting which, when enabled, requires that the session ID used to access
 the administration matches the operators IP address used when logging
 into the admin. This is to prevent users who follow referrer links
 clicked on in the "data" tab that have the session ID in the query
 string from gaining access to the admin. However, the downside in
 enabling this is that operators with dynamic ip addresses will not be
 able to log in.\n\n - **User Name:** - This is your CSLH login name
 that you use to login to CSLH\n - **Password:** - This is your CSLH
 password that you use to login to CSLH\n - **URL:** - this is the
 website address pointing to your CSLH install. Example:\n
 "http://www.YourDomain.com/CSLH"\n
 "www.YourDomain.com/live\_help"\n Do not use
 "www.YourDomain.com/login.php"\n - **Start in live chat mode:** " if
 this is checked, and then when you start up **"LiveClient2,**
**LiveClient2"** will automatically navigate you to the chat or "Live
 Help!" section of CSLH.\n - Start Normal, Start Maximized, or Start
 Minimized circle/dot option\n - **Start Normal:** " If this one is
 checked then **"LiveClient2"** will start up at a normal size.\n -
 **Start Maximized:** " If this one is checked then **"LiveClient2"**
 will start up maximized (the client will be full sized to your screen).
 \n - **Start Minimized:** - If this one is checked then
 **"LiveClient2"** will start up minimized to your system tray. This means
 no client window will be visible but it will still be running in your
 system tray.\n - **Sessions:** " If this box is checked then your
 client will remember the size of the windows when you close them and
 open back up at the same size and location that they were last closed.\n
 - **Startup "LiveClient"** with Windows: " If this box is
 check then **"LiveClient2"** should start up and run when Windows is
 started up.\n - **Add Quick Launch Icon:** " Pushing this button
 will add **"LiveClient2"** to your quick launch area. (This can also be
 done during the install).\n - **Add Desktop Icon:** " Pushing this
 button will add **"LiveClient2"** to your Desktop (this can also be done
 during the install).\n\n====Notification Setup====\n - **Popup
 notify when new visitors enter the room:** " If this box is checked,

then a popup notification will notify you when new visitors enter a web site.\n - **\*\*Keep popup displayed until I close it:\*\*** â€œ Checking this will keep your popup notifications open until you close the notification by clicking the close button â€œxâ€œ. Chat popups always stay open until you close them so you donâ€™t miss a chat.\n - **\*\*Disable popup sounds:\*\*** â€œ Check this if you do not want **\"LiveClient2â€™s\"** built in sounds to sound off when the popup come up.\n - **\*\*Seconds notification popup is up for if active:\*\*** â€œ Put the number of seconds in this box that you want the popups to be displayed for before they disappear.\n\n====Status Setup====\n - **\*\*Minutes of inactivity before going offline\*\*** - This is an option to go offline after the computer is idle for so many minutes. Set this to the number of minutes you want to be idle before going offline or set to 0 (zero) to disable. When you are taken offline you will still receive notifications of visitors, but you will be unavailable for chat. Visitors will see you as unavailable for chat.\n - **\*\*Go back online when activity is detected\*\*** - This will set your available status back to online if you were automatically set offline from inactivity.\n - **\*\*Set status to online at LC2 start up\*\*** - This will set your available status to online when LC2 is started up. This will allow you to be available for chat immediately, without navigating to the chat screen.\n\n====Profile Manager====\n - **\*\*Open profile chooser on LC2 startup\*\*** - When this is checked, a profile option box will open when you start up LC2. This is to allow the user to select a profile before continuing to run the program. Good if you have multiple profiles.\n - **\*\*Add New button\*\*** - This button will add a new profile with the name you have put in the box to the left. You will need to configure this profile the first time you run it.\n - **\*\*Delete button\*\*** - This will delete the profile that you have selected in the list box to the left.\n - **\*\*Make Default button\*\*** - Highlight the profile from the list that you want to be default and then click the **\*\*Make Default\*\*** button. This will make that profile default and that profile will start up when LC2 starts if profile chooser is not set to start at startup.\n\n - **\*\*OK:\*\*** â€œ will save and close your options.\n - **\*\*Cancel:\*\*** â€œ will close options without saving.\n - **\*\*Apply:\*\*** â€œ will save your options without closing options (some options need a restart before taking effect).', 'FlatterY', 'FlatterY', 'N', '2.5.0', 'page');\nINSERT INTO `pages` VALUES (100, 'OptionSettings', '2006-12-16 15:27:38', '[[HelpDocuments Return to table of contents.]]\n\n\n====Options====\n\nAfter installing a fresh copy of **\"LiveClient2\"** you will be asked to set the **\"LiveClient2\"** options.\nEven if it isnâ€™t a fresh install, it is a good idea to check the options after an upgrade because you may have new options that you will want to configure.\n\nLetâ€™s go through the options\n\n==== Website Login Setup====\n - **\*\*Automatic login at start up:\*\*** â€œ if you have this check then you will automatically log in to your CSLH web site when **\"LiveClient2\"** is started up.\n - **\*\*Match IP to sessions:\*\*** - **\"Match Ip to Session\"** is a security setting which, when enabled, requires that the session ID used to access the administration matches the operators IP address used when logging into the admin. This is to prevent users who follow referrer links clicked on in the **\"data\"** tab that have the session ID in the query string from gaining access to the admin. However, the downside in enabling this is that operators with dynamic ip addresses will not be able to log in.\n\n - **\*\*User Name:\*\*** - This is your CSLH login name that you use to login to CSLH\n - **\*\*Password:\*\*** - This is your CSLH password that you use to login to CSLH\n - **\*\*URL:\*\*** - this is the website address pointing to your CSLH install. Example:\n\n **\"http://www.YourDomain.com/CSLH\"**\n **\"www.YourDomain.com/live\_help\"** Do not use\n **\"www.YourDomain.com/login.php\"**\n - **\*\*Start in live chat mode:\*\*** â€œ

if this is checked, and then when you start up "LiveClient2, LiveClient2" will automatically navigate you to the chat or "Live Help!" section of CSLH.

- Start Normal, Start Maximized, or Start Minimized circle/dot option
- **Start Normal:** If this one is checked then "LiveClient2" will start up at a normal size.
- **Start Maximized:** If this one is checked then "LiveClient2" will start up maximized (the client will be full sized to your screen).
- **Start Minimized:** If this one is checked then "LiveClient2" will start up minimized to your system tray. This means no client window will be visible but it will still be running in your system tray.
- **Sessions:** If this box is checked then your client will remember the size of the windows when you close them and open back up at the same size and location that they were last closed.
- **Startup "LiveClient" with Windows:** If this box is checked then "LiveClient2" should start up and run when Windows is started up.
- **Add Quick Launch Icon:** Pushing this button will add "LiveClient2" to your quick launch area. (This can also be done during the install).
- **Add Desktop Icon:** Pushing this button will add "LiveClient2" to your Desktop (this can also be done during the install).

====Notification Setup====

- **Pop up notify when new visitors enter the room:** If this box is checked, then a popup notification will notify you when new visitors enter a web site.
- **Keep popup displayed until I close it:** Checking this will keep your popup notifications open until you close the notification by clicking the close button. Chat popups always stay open until you close them so you don't miss a chat.
- **Disable popup sounds:** Check this if you do not want "LiveClient2" built in sounds to sound off when the popup come up.
- **Seconds notification popup is up for if active:** Put the number of seconds in this box that you want the popups to be displayed for before they disappear.

====Status Setup====

- **Minutes of inactivity before going offline:** This is an option to go offline after the computer is idle for so many minutes. Set this to the number of minutes you want to be idle before going offline or set to 0 (zero) to disable. When you are taken offline you will still receive notifications of visitors, but you will be unavailable for chat. Visitors will see you as unavailable for chat.
- **Go back online when activity is detected:** This will set your available status back to online if you were automatically set offline from inactivity.
- **Set status to online at LC2 start up:** This will set your available status to online when LC2 is started up. This will allow you to be available for chat immediately, without navigating to the chat screen.

====Profile Manager==== (If you do not wish to use more than one profile you can leave this area empty.)

- **Open profile chooser on LC2 startup:** When this is checked, a profile option box will open when you start up LC2. This is to allow the user to select a profile before continuing to run the program. Good if you have multiple profiles.
- **Add New button:** This button will add a new profile with the name you have put in the box to the left. You will need to configure this profile the first time you run it.
- **Delete button:** This will delete the profile that you have selected in the list box to the left.
- **Make Default button:** Highlight the profile from the list that you want to be default and then click the **Make Default** button. This will make that profile default and that profile will start up when LC2 starts if profile chooser is not set to start at startup.
- **OK:** will save and close your options.
- **Cancel:** will close options without saving.
- **Apply:** will save your options without closing options (some options need a restart before taking effect).

Forum]] | ScreenShots | FeatureRequest | DonationPage\n----\n**###LC2
Version 2.5.2 (in progress)**\n      - Added spell check button using
iespell program.\n\n**###LC2 Version 2.5.1**\n      - Bug Fix: fixed bug
that disabled accessibility to the system tray icon while search frame
was hidden.\n\n**###LC2 Version 2.5**\n      - Changed some shutdown
procedures for a cleaner shutdown.\n      - Added profile options.\n
      - LC2 now restores to the set state (not just normal state).\n
      - You can now use the search to search your own website or any
website\n      - Website search domain is saved\n      - Last search status
(open/close) is saved and restored every session.\n      - Profile manager
added to option tabs (can add, delete, and make default).\n      - Multiple
Profiles can be used and ran with LC2.\n      - Option to go back online

```

when computer activity is detected (when auto set offline).\n\n\*\*\*LC2  
Version 2.4.2\*\*\n - Fixed a layout bug in the options section. Small  
issue.\n - Set default value for idle time. New users would crash the  
system if they didn't set this setting so now it has a default of 0 (or  
off).\n\n\*\*\*LC2 Version 2.4.2\*\*\n - Fixed popup bug.\n\n\*\*\*LC2  
Version 2.4\*\*\n - Can press enter while in search box.\n - Add more  
status text info.\n - Rebuilt the popup notification... No longer  
running from DLLs. One compile for all Window OSes.\n - One setup file  
for Windows 95/95, ME, 2000, and XP.\n - Removed the check if right  
version because it is no longer needed.\n - Sound notification now works  
independently of the popup notification. (meaning you can now have both  
or one or the other.)\n\n\*\*\*LC2 Version 2.3.5\*\*\n - Rearranged menus  
\n - Added menu option to check if right version is running with the  
OS and correct Service Packs installed.\n - Added built in google search  
(to help the user search for answers to customers).\n - Realized that  
the popup doesn't work if compiled with SP2 but running without and  
vice versa, so made a SP2 compiled version for Windows XP. \n -  
Updated the installer.\n\n\*\*\*LC2 Version 2.3\*\*\n - Menu options to  
change online status from LC2.\n - Added option to go Offline with  
inactivity.\n - Set to use phpsession to work around odd bug.\n  
- Changed the popup tool window to a fully adjustable window.\n  
- Added matchip option <input type=radio name=matchip value=Y>\n  
- Added Start status online at startup\n - Added help links to  
[[CraftySyntax.com]] and to the LC2 donation page.\n - Fixed odd bug  
that caused login problems for some. (Stopped LC2 from contacting site  
untill fully logged in)\n - Added status bar with online/offline  
status, visitor counts, chat counts, and general status information.\n  
- Major clean up of code and variables. Should make things a  
little quicker.\n\n\*\*\*LC2 Version 2.2\*\*\n - Added encryption to  
password in the settings file\n - Fixed the reconnect menu option  
that I broke some time ago when making other changes\n - Added  
Documentation menu option\n - Check for updates menu option (under  
tools)\n - Check for newest release of the server file installed\n  
(Shows up under the tool menu option to download if newest file is  
not installed)\n\n###Older releases\n A changelog was not tracked

windows client for Crafty Syntax Live Help. It comes with many added features that allow you to know what is going on by quickly looking at the system tray Icon. You will also need to install the LC2 Server file to your server for the new features to work.

	<p>Some current features include:\n</p> <ul style="list-style-type: none"> <li>- MSN style pop-up and sound notifications from system tray.\n</li> <li>- Minimizable to system tray.\n</li> </ul>
---	---

System tray icon changes with site status (idle, visitors, or chatters).\n

- Auto login features.\n
- Auto update options.\n
- Session options to remember window placements.\n
- Options to start in live chat mode.\n
- Options to start maximized, minimized or normally.\n
- Optional auto offline after being idle X number of minutes (configurable option).\n
- Ability to change online and offline status through client.\n
- User will stay available online even after leaving the chat page so chats can still come in while you are doing other things. Go offline to stop chats.\n
- Built in Google search.\n
- Spell check using iespell.\n

\nFeb. 16, 2007\n Release version 2.5.3 with a new spell check feature. F7 shortcut and menu spell check options using iespell. [[ChangeLog Click here to view the entire change log]].\n\nDec. 16, 2006\n Release version 2.5.1 with one minor bug fix. Before if the search frame was hidden, you could not do anything with the system tray icon. This is fixed thanks to markreiss (from the forums) reporting the problem.\n\nDec. 1, 2006\n Released version 2.5.0 today. This release includes profiles and profile management, search your a website feature, feature to go back online when computer activity is detected, changed some shutdown procedures for a cleaner shutdown, and a few other things. [[ChangeLog Click here to view the entire change log]].\n\nOct. 5, 2006 (Later in the day)\n Released version 2.4.3. Releasing bug fixes faster than Mr Gates. Thanks to volcano I found a few other bugs... and squashed them. Auto update and get the newest release today... sorry guys... remember to report bugs and feature requests to me so I can make this the best client it can be.\n \nOct. 5, 2006\n Ooops, I found a bug in LC2 version 2.4.0. If your popups only work when you first start LC2 and then they stop working you need to download this bug release version 2.4.2. Those who already have version 2.2 and up can use the check for updates to check and install automatically. In version 2.4.0 this can be found under the "Help" menu.\n\n\nAug. 29, 2006\n Released LC2 version 2.4 today. I was getting tired of compiling ever new release on multiple OSes so I finally rebuilt the pop-up notification code so that one setup file will work on Window OSes. This may also lead to cosmetic changes in the pop-up in the future. If you had problems with the pop-up notification not working then this is the release for you. You should install this version as the rebuild should allow it to work now. [[ChangeLog Click here to view the entire change log]].\n \n \nAug. 19, 2006\n Released another version of LC2 today. version 2.3 is now available. Even though it has only been a few days since 2.2, once I get working on something, I have a hard time putting it down. This is a pretty big release with some nice new features and some bug fixes. If you have had any issues with older versions of LC2, you will want to download this new version. [[ChangeLog Click here to view the entire change log]].\n \n\n\nUseful pages: FormattingRules, WantedPages, TextSearch.', 'FlatterY', 'FlatterY', 'N', '2.5.3', 'page');

Check spelling with menu button and F7 shortcut key.\n\n***##LC2 Version 2.5.1**\n - Bug Fix: fixed bug that disabled accessibility to the system tray icon while search frame was hidden.\n\n***##LC2 Version 2.5**\n - Changed some shutdown procedures for a cleaner shutdown.\n - Added profile options.\n - LC2 now restores to the set state (not just normal state).\n - You can now use the search to search your own website or any website\n - Website search domain is saved\n
```

- Last search status (open/close) is saved and restored every session.\n

- Profile manager added to option tabs (can add, delete, and make default).\n

- Multiple Profiles can be used and ran with LC2.\n

- Option to go back online when computer activity is detected (when auto set offline).\n\n\*\*\*###LC2 Version 2.4.2\*\*\n

- Fixed a layout bug in the options section. Small issue.\n

- Set default value for idle time. New users would crash the system if they didn't set this setting so now it has a default of 0 (or off).\n\n\*\*\*###LC2 Version 2.4.2\*\*\n

- Fixed popup bug.\n\n\*\*\*###LC2 Version 2.4\*\*\n

- Can press enter while in search box.\n

- Add more status text info.\n

- Rebuilt the popup notification... No longer running from DLLs. One compile for all Window OSes.\n

- One setup file for Windows 95/95, ME, 2000, and XP.\n

- Removed the check if right version because it is no longer needed.\n

- Sound notification now works independently of the popup notification. (meaning you can now have both or one of the other.)\n\n\*\*\*###LC2 Version 2.3.5\*\*\n

- Rearranged menus\n

- Added menu option to check if right version is running with the OS and correct Service Packs installed.\n

- Added built in google search (to help the user search for answers to customers).\n

- Realized that the popup doesn't work if compiled with SP2 but running without and vice versa, so made a SP2 compiled version for Windows XP. \n

- Updated the installer.\n\n\*\*\*###LC2 Version 2.3\*\*\n

- Menu options to change online status from LC2.\n

- Added option to go Offline with inactivity.\n

- Set to use phpsession to work around odd bug.\n

- Changed the popup tool window to a fully adjustable window.\n

- Added matchip option <input type=radio name=matchip value=Y>\n

- Added Start status online at startup\n

- Added help links to [[CraftySyntax.com]] and to the LC2 donation page.\n

- Fixed odd bug that caused login problems for some. (Stopped LC2 from contacting site untill fully logged in)\n

- Added status bar with online/offline status, visitor counts, chat counts, and general status information.\n

- Major clean up of code and variables. Should make things a little quicker.\n\n\*\*\*###LC2 Version 2.2\*\*\n

- Added encryption to password in the settings file\n

- Fixed the reconnect menu option that I broke some time ago when making other changes\n

- Added Documentation menu option\n

- Check for updates menu option (under tools)\n

- Check for newest release of the server file installed\n

(Shows up under the tool menu option to download if newest file is not installed)\n\n###Older releases\n

LC2. LC2 needs donations to keep updates coming and to keep it free.</b>  
</h3>\n<br><br>\nDocumentation site for CSLH Live Client.\n\n(Always under  
construction.)\n<br><br>\nThis is a front end, windows client for Crafty  
Syntax Live Help. It comes with many added features that allow you to  
know what is going on by quickly looking at the system tray Icon. You  
will also need to install the LC2 Server file to your server for the new  
features to work.\n\n</td><td align=right><img src=LC2Box.jpg></td></tr>

</table>"Some current features include:\n
 - MSN style pop-up and sound notifications from system tray.\n
 - Minimizable to system tray.\n
 - System tray icon changes with site status (idle, visitors, or chatters).\n
 - Auto login features.\n
 - Auto update options.\n
 - Session options to remember window placements.\n
 - Options to start in live chat mode.\n
 - Options to start maximized, minimized or normally.\n
 - Optional auto offline after being idle X number of minutes (configurable option).\n
 - Ability to change online and offline status through client.\n
 - User will stay available online even after leaving the chat page so chats can still come in while you are doing other things. Go offline to stop chats.\n
 - Built in Google search.\n
 - Spell check using iespell.\n
 \nFeb. 16, 2007\n
 Release version 2.5.3 with a new spell check feature. F7 shortcut and menu spell check options using iespell. [[ChangeLog Click here to view the entire change log]].\n
 \nDec. 16, 2006\n
 Release version 2.5.1 with one minor bug fix. Before if the search frame was hidden, you could not do anything with the system tray icon. This is fixed thanks to markreiss (from the forums) reporting the problem.\n
 \nDec. 1, 2006\n
 Released version 2.5.0 today. This release includes profiles and profile management, search your a website feature, feature to go back online when computer activity is detected, changed some shutdown procedures for a cleaner shutdown, and a few other things. [[ChangeLog Click here to view the entire change log]].\n
 \nOct. 5, 2006 (Later in the day)\n
 Released version 2.4.3. Releasing bug fixes faster than Mr Gates. Thanks to volcano I found a few other bugs... and squashed them. Auto update and get the newest release today... sorry guys... remember to report bugs and feature requests to me so I can make this the best client it can be.\n
 \nOct. 5, 2006\n
 Ooops, I found a bug in LC2 version 2.4.0. If your popups only work when you first start LC2 and then they stop working you need to download this bug release version 2.4.2. Those who already have version 2.2 and up can use the check for updates to check and install automatically. In version 2.4.0 this can be found under the "Help" menu.\n
 \nAug. 29, 2006\n
 Released LC2 version 2.4 today. I was getting tired of compiling ever new release on multiple OSes so I finally rebuilt the pop-up notification code so that one setup file will work on Window OSes. This may also lead to cosmetic changes in the pop-up in the future. If you had problems with the pop-up notification not working then this is the release for you. You should install this version as the rebuild should allow it to work now. [[ChangeLog Click here to view the entire change log]].\n
 \nAug. 19, 2006\n
 Released another version of LC2 today. version 2.3 is now available. Even though it has only been a few days since 2.2, once I get working on something, I have a hard time putting it down. This is a pretty big release with some nice new features and some bug fixes. If you have had any issues with older versions of LC2, you will want to download this new version. [[ChangeLog Click here to view the entire change log]].\n
